

CORPORATE RESUME

BRYAN A. MCIVER, Managing Director & Principal

PROFILE

Responsible for overseeing business development activities and business operations. Bryan brings a wealth of experience in the design and construction of FTTx networks and general telecom outside plant (OSP), that is complimented by a strong background in business administration and information systems design and development.

PROJECT EXPERIENCE HIGHLIGHTS

Oregon FTTH Network Expansion, Project Manager **Completed June 2008**
\$350,000
Comspan Communications, Oregon, USA

Responsible for the planning and level-one engineering of 10 separate, local access, fiber-to-the-home networks in Oregon. Planning included feasibility studies examining outside plant construction, facilities placement, permitting requirements and detailed market enumeration.

- Completed on time and more than 40% under budget.

Reedsport FTTH Network, Project Manager **Completed April 2008**
\$1.2 million
Comspan Communications, Reedsport, Oregon, USA

Responsible for the engineering, permitting, construction and test and turn-up, of this GPON fiber-to-the-home network as well as the construction and integration of the central office shelter and the cut-over of customer premises. The OSP network included 145,000ft (44,000m) of both underground and aerial fiber plant, passing 2,400 premises.

- Completed ahead of schedule and 15% under budget.

Myrtle Point FTTH Network, Project Manager **Completed January 2008**
\$3.5 million
Comspan Communications, Myrtle Point, Oregon, USA

This project included an aggressive timeline as well as the construction of an extended transport route through sensitive wetland areas. Responsible for the engineering, permitting, construction and test and turn-up of this GPON fiber-to-the-home network as well as the construction and integration of the central office shelter and the cut-over of customer premises. The OSP network included 90,000ft (27,500m) of both underground and aerial fiber plant, passing 1,200 premises.

- Successfully negotiated the permitting and construction of a 3.5 mile (6 kilometer) transport build, through sensitive wetland areas, for a savings of \$100,000.
- Completed 2 weeks ahead of schedule and over 30% under budget.

Coquille FTTH Network, Project Manager **Completed October 2007**
\$4.6 million
Comspan Communications, Coquille, Oregon, USA

This project represented the first fiber-to-the-home project completed by Bryan's team and included the engineering, permitting, construction and test and turn-up, of this GPON fiber-to-the-home network as well as the construction of a 5 mile (8.5 kilometer) transport route, the integration of the central office shelter and the cut-over of customer premises. The OSP network included 140,000ft (43,000m) of both primarily aerial fiber plant, passing 2,500 premises.

- Completed on time and on budget.

Prince Rupert to Terrace Fiber Link, Project Manager **Completed August 2007**
\$7.1 million
CityWest Telephone & Cable Company, Prince Rupert, British Columbia, Canada

Construction and engineering of a 150 kilometer, underground fiber link, paralleling the #16 Highway, linking Prince Rupert and Terrace, BC.

- Completed ahead of client's deadline and under budget.
- Utilized unique construction methods to meet and exceeded Ministry of Transportation construction and restoration requirements.
